

NKH Y-8※ Hand Type Oil Pump

NKHY pull type oil pump is suitable for resist type lubrication system (Single line resist-type lubrication system), The oil is measured and delivered in proportion to each lube point of the system via resist type distributors. In addition, The pull type oil pump with the pressure taken-off mechanism is suitable for positive displacement volume type lubrication system, it can deliver the dosing oil to each lube point via positive displacement volume type distributors.

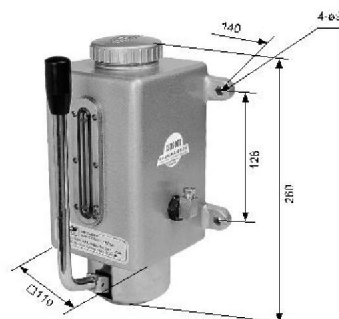

The pump is widely used in machine tools, wood-working machines, textile machines, plastic machines, packing machines and so on.

● Specifications

Model	Discharge Capacity (cc/st)	Max.discharge pressure Kgf/cm ²	Reservoir Capacity L	Discharge Bore	Outlet Quantity	Suitable System Type
NKHY-8	8	15	0.6	M10*1 (φ6)	1 left+1 right	Resist-Type
NKHY-8X	8	15	0.6	M10*1 (φ6)	1 left+1 right	Volume Type
PH-1600T	16	25	1.6	M10*1 (φ6)	1 left+1 right	Resist-Type
PH-1600	16	25	1.6	M10*1 (φ6)	1 left+1 right	Volume Type

※ NKHY-8X/PH-1600T with pressure taken-off mechanism is suitable for positive displacement volume type distributor, but it can not be used together with resist type distributors.
